Vol. 43 No. 2 February 29, 2020

## Overview

<b>Tour d'Horizon of Recent Advances in RUNX Family Gene Research</b> <i>Suk-Chul Bae</i> .....	97
--	----

## Minireviews

<b>Role of RUNX Family Transcription Factors in DNA Damage Response</b> <i>Ann Sanoji Samarakkody, Nah-Young Shin, and Alan B. Cantor</i> .....	99
<b>The Roles of RUNX Family Proteins in Development of Immune Cells</b> <i>Wooseok Seo and Ichiro Taniuchi</i> .....	107
<b>The Role of Lozenge in <i>Drosophila</i> Hematopoiesis</b> <i>Ferdinand Koranteng, Nuri Cha, Mingyu Shin, and Jiwon Shim</i> .....	114
<b>The RUNX1 Enhancer Element eR1: A Versatile Marker for Adult Stem Cells</b> <i>Linda Shyue Huey Chuang, Motomi Osato, and Yoshiaki Ito</i> .....	121
<b>RUNX1 Dosage in Development and Cancer</b> <i>Michael Lie-a-ling, Renaud Mevel, Rahima Patel, Karen Blyth, Esther Baena, Valerie Kouskoff, and Georges Lacaud</i> .....	126
<b>RUNX1 Mutations in the Leukemic Progression of Severe Congenital Neutropenia</b> <i>Patricia A. Olofsen and Ivo P. Touw</i> .....	139
<b>The Clinical, Molecular, and Mechanistic Basis of RUNX1 Mutations Identified in Hematological Malignancies</b> <i>Asumi Yokota, Li Huo, Fengli Lan, Jianqiang Wu, and Gang Huang</i> .....	145
<b>The Role of RUNX1 in NF1-Related Tumors and Blood Disorders</b> <i>Youjin Na, Gang Huang, and Jianqiang Wu</i> .....	153
<b>Post-Translational Regulations of Transcriptional Activity of RUNX2</b> <i>Hyun-Jung Kim, Woo-Jin Kim, and Hyun-Mo Ryoo</i> .....	160
<b>Molecular Mechanism of Runx2-Dependent Bone Development</b> <i>Toshihisa Komori</i> .....	168
<b>Oncogenic RUNX3: A Link between p53 Deficiency and MYC Dysregulation</b> <i>Yuki Date and Kosei Ito</i> .....	176
<b>Role of RUNX Family Members in G<sub>1</sub> Restriction-Point Regulation</b> <i>Jung-Won Lee and Suk-Chul Bae</i> .....	182
<b>Complex Interplay between the RUNX Transcription Factors and Wnt/<math>\beta</math>-Catenin Pathway in Cancer: A Tango in the Night</b> <i>Kerri Sweeney, Ewan R. Cameron, and Karen Blyth</i> .....	188
<b>CROX (Cluster Regulation of RUNX) as a Potential Novel Therapeutic Approach</b> <i>Yasuhiko Kamikubo</i> .....	198
