Manuscript Title	_____
Corresponding author (Name)	_____
	(Affiliation) _____

• **Copyright: Notes for Contributors**

1. The copyright to this article is transferred to KSMCB effective if and when the article is accepted for publication. The copyright transfer covers the exclusive right to reproduce and distribute the article in various forms including reprints, translations, photographic reproductions, microfilms, or other electronic media.
2. The journal's policy is to acquire copyright for all contributions. There are two reasons for this:
(a) Ownership of copyright by one central organization tends to ensure maximum international protection against infringement.
(b) It also ensures that requests by third parties to reprint a contribution, or part of it, are handled efficiently and in accordance with a general policy which is sensitive both to any relevant changes in international copyright legislation and to the general desirability of encouraging the dissemination of knowledge.
3. All contributions will be rendered Open Access under the terms and conditions of the Creative Commons Attribution-NonCommercial-ShareAlike 3.0 Unported License (<http://creativecommons.org/licenses/by-nc-sa/3.0/>) which allow use and distribution (thus including reproduction) in any medium as long as the contribution is cited properly and not used for commercial purposes.
4. The above conditions for Open Access use of the contribution apply to authors as well but do not permit dual publication which is in violation of ethical regulations of KSMCB and Mol. Cells.
5. The author or the author's employer retains all proprietary rights other than the copyright such as patent rights.
6. If the contribution is owned by the company/employer of the author/authors, such party must sign a separate copy of this agreement.
7. In the case of reprints, the contents of the article may be stored electronically and then printed to meet individual requests.
8. In cases of multi-author contributions, it is understood that the signatory of this form signs on their behalf and agrees to obtain consents of his/her co-authors regarding the contents of this agreement.
