

Supplementary figure 1

Supplementary figure 1. Effect of visfatin on ER α and Foxo1 gene expression.

MCF-7 cells were plated in 6-well plates and incubated for 6 h in the presence of visfatin (500 ng/ml) to examine expression patterns of ER α and Foxo1 genes by relative RT-PCR. Treatment of MCF-7 cells with visfatin does not alter ER α (A) and Foxo1 (B) mRNA levels. The data were expressed as the mean \pm S.E.M (n=5).
